## ASSOCIATE GRADUATION RATES (4, 6, AND 8 YEARS) ±DISAGGREGATED

**DEFINITION:** The percentage of first-time, full-time associate degree-seeking freshmen who enter the institution for the first time in a given fall semester and earn their degree within 4 years (200% normal time to complete), 6 years, and 8 years.

**RATIONALE:** Measuring the graduation rates for students entering as associate degree seekers recognizes this significant cohort of students. As with baccalaureate degrees, timely completions save students money and can indicate effectiveness of academic planning and student support. Because many UAA students transition from full to part time enrollment from one semester to the next, extending the timeframe for tracking graduation provides a more complete picture of UAA student completions. Using 4, 6, and 8 years allows UAA to compare to its list of institutional peers.

**PEER COMPARISON:** Peer comparison data are available through IPEDS 2020 for associate 4-, 6-, and 8-year graduation rates, shown below sorted by year rate. The rates reported are significantly lower than the actual

## JUNIOR GRADUATION RATE ±DISAGGREGATED

**DEFINITION:** The percentage of students who graduate with a bachelor's degree within 4 years of first reaching junior class status (60 credits).

**RATIONALE:** Junior graduation rate (after 60 credits) can reflect a department's success in helping students complete their degrees. Within their first 60 credits, students typically focus on completing General Education Requirements (GERs) and often switch majors. Tracking how long it takes students to complete their degrees after 60 credits, when many students have likely committed to a specific major, can provide actionable information for departments.

**PEER COMPARISON:** There are no data sources for peer comparisons on this measure.
